$U_A = -\frac{1}{R \cdot C} \int_{t_0}^{t_1} U_E(t) dt + U_{A0}$	insert sine function	$U_E(t) = \hat{U}_E \sin(\omega \cdot t)$
$U_A = -\frac{1}{R \cdot C} \int_{t_0}^{t_1} \hat{U}_E \sin(\omega \cdot t) dt + U_{A0}$	insert root function with limits	$\int_{x_0}^{x_1} \sin(a \cdot x) dx = [-\frac{1}{a} \cos(a \cdot x)]_{x_0}^{x_1}$
$U_A = -\frac{1}{R \cdot C} \int_{t_0}^{t_1} \hat{U}_E \cos(\omega \cdot t) dt + U_{A0}$	put constant before integral	
$U_A = \frac{1}{R \cdot C} \int_{t_0}^{t_1} \hat{U}_E \cos(\omega \cdot t) dt + U_{A0}$	insert limits	$t_0=0, t_1=t$
$U_A = \frac{\hat{U}_E}{R \cdot C} \int_{t_0}^{t_1} \cos(\omega \cdot t) dt + U_{A0}$		$\cos(0) = 1$
$U_A = \frac{\hat{U}_E}{R \cdot C} \int_{t_0}^{t_1} \cos(\omega \cdot t) dt + U_{A0}$	multiply	
$U_A = \frac{\hat{U}_E}{R \cdot C} \int_{t_0}^{t_1} \cos(\omega \cdot t) dt + U_{A0}$	consider the non-cosine terms	
$U_A = \frac{\hat{U}_E}{R \cdot C} \int_{t_0}^{t_1} \cos(\omega \cdot t) dt + U_{A0}$	This part is independent in time. Since we assume purely sinusoidal quantities, the for the initial voltage of the capacitor must be:	$U_{A0} = \hat{U}_E \int_{t_0}^{t_1} \cos(\omega \cdot t) dt$
$U_A = \frac{\hat{U}_E}{R \cdot C} \int_{t_0}^{t_1} \cos(\omega \cdot t) dt + U_{A0}$		
$U_A = \frac{\hat{U}_E}{R \cdot C} \int_{t_0}^{t_1} \cos(\omega \cdot t) dt + U_{A0}$
