exam ee1 SS2023

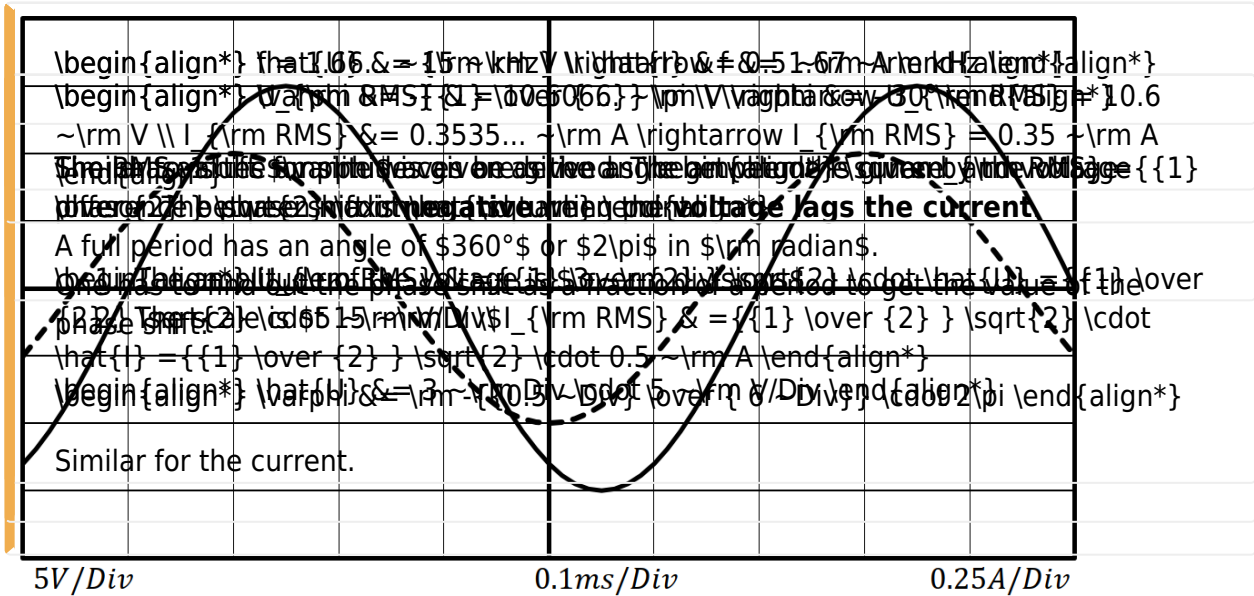

Exercise E2 Analyzing a Scope Plot
 (written test, approx. 12 % of a 60-minute written test, SS2023)

Q. What is the phase difference between the voltage and current (in radians and degree)?

Result: The measured current curve shall be visible as a dashed line.

The continuous line shows the voltage.

Solution

Use the correct symbols and units in your answers!

1. Calculate the frequency f of the periodic signals.

Solution

Frequency f is given by the period T . The period can be measured in the image of the scope.

1. The sine waves repeat after $6 \sim \text{divisions}$ (e.g. from falling turning point to falling turning point of one curve)
2. The scale is $0.1 \sim \text{ms/Div}$

$$f = \frac{1}{T} \quad T = 6 \sim \text{Div} \cdot 0.1 \sim \text{ms/Div} \\ \rightarrow f = \frac{1}{6 \sim \text{Div} \cdot 0.1 \sim \text{ms/Div}}$$
