Exercise E1 Analyzing a Scope Plot (written test, approx. 12 % of a 60-minute written test, SS2023) 2

exam ee1 SS2023

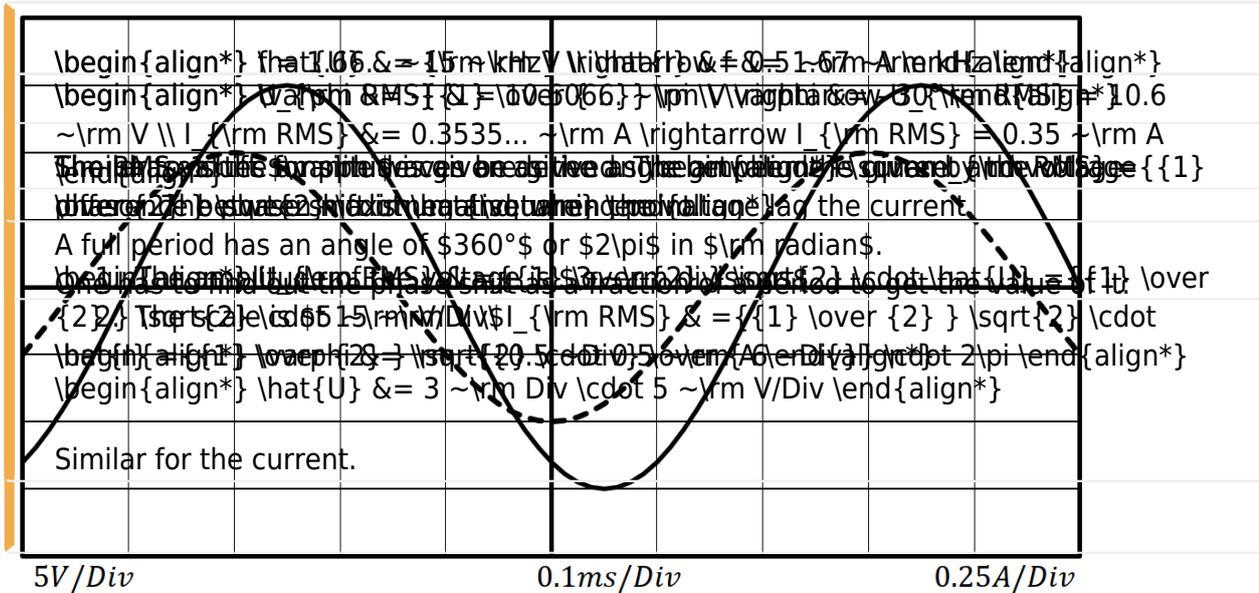

Exercise E1 Analyzing a Scope Plot
 (written test, approx. 12 % of a 60-minute written test, SS2023)

0. What is the phase shift (in degrees) between the voltage and current?

Result: The measured current curve shall be visible as a dashed line.

The continuous line shows the voltage.

Solution

Use the correct symbols and units in your answers!

1. Calculate the frequency f of the periodic signals.

Solution

Frequency f is given by the period T . The period can be measured in the image of the scope.

1. The sine waves repeat after 6 Div (e.g. from falling turning point to falling turning point of one curve)
2. The scale is 0.1 ms/Div

$$f = \frac{1}{T} \quad T = 6 \text{ Div} \cdot 0.1 \text{ ms/Div} \rightarrow f = \frac{1}{6 \text{ Div} \cdot 0.1 \text{ ms/Div}}$$
