Do physics right 2
Do exam right 2

Preparation

Do math right

- calculate fractions correct:
$$\begin{aligned} \frac{\frac{A}{B}}{C} &\quad \neq \quad \frac{A}{\frac{B}{C}} \\ \frac{A}{\frac{B}{C}} &\quad = \quad \frac{A}{B \cdot C} \quad \neq \quad \frac{A}{B} \cdot C \end{aligned}$$

Do physics right

- Check the units. e.g. dB cannot be converted in V
- Prove you (mis)conceptions on impedances
 - Check whether Z or \underline{Z} is needed in formulas: $Z = \underline{Z} \neq \underline{\underline{Z}}$
 - impedances are not (only) resistors, at least do not think of R is given as \underline{Z} .
 - For purely ohmic components the other way around is correct: $\underline{Z} = R$.
 - However, impedances 'act' like ohmic resistors in formulars.
E.g. for the series circuit: $R_{\text{eq}} = R_1 + R_2 + R_3 + \dots \rightarrow \underline{Z}_{\text{eq}} = \underline{Z}_1 + \underline{Z}_2 + \underline{Z}_3 + \dots$

Do exam right

- Do not miss out questions. Sometimes there is more than one answer required
