Step-by-step solution for  $X_0$ ;  $XOR$ ;  $X_1$

1. Interpretation of the timing diagram:  
 $\quad$

The time course of  $X_0$  and  $X_1$  can be interpreted as  $0$ 's and  $1$ 's

1. Interpretation of the timing diagram:  
 $\quad$

2. Goal is to find the result for each column:  
\$\quad\$

3. Sometimes an intermediate step is advantageous:  
\$\quad\$

4. Now we have to calculate each step:  
\$\quad\$

In theory, this can be done for every time step. However, for more complex formulas it is easier to

10. Goal is to find the result for each column:

$\quad$
