Step-by-step solution for X_0 ; XOR ; X_1

1. Interpretation of the timing diagram:
 \quad

The time course of X_0 and X_1 can be interpreted as 0 's and 1 's

1. Interpretation of the timing diagram:
 \quad

2. Goal is to find the result for each column:
\$\quad\$

3. Sometimes an intermediate step is advantageous:
\$\quad\$

4. Now we have to calculate each step:
\$\quad\$

In theory, this can be done for every time step. However, for more complex formulas it is easier to

10. Goal is to find the result for each column:

\quad
