# Inverting Operational Amplifier

Build the following circuit in [figure 1](#) with the power supply and a multimeter.

Fig. 1: Inverting Op-Amp

$$U_{DD} = 10\text{ V}, U_{SS} = -10\text{ V}, R_2 = 100\text{ k}\Omega$$

Calculate the necessary value for  $R_1$ , so that the Output  $U_{OUT}$  is 5 V. Use the supply voltage from the operational amplifier for  $U_{IN}$ .
