## Inverting Operational Amplifier

Build the following circuit in [figure 1](#) with the power supply and a multimeter.

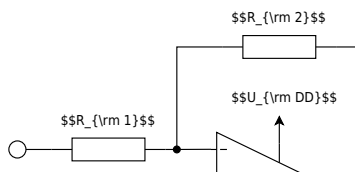

Fig. 1: Inverting Op-Amp

$U_{\text{DD}} = 10 \text{ V}$ ,  $U_{\text{SS}} = -10 \text{ V}$ ,  $R_2 = 100 \text{ k}\Omega$

Calculate the necessary value for  $R_1$ , so that the Output  $U_{\text{OUT}}$  is 5 V. Use the supply voltage of the operational amplifier for  $U_{\text{IN}}$ .
