Non-inverting Operational Amplifier

Op-Amp as current source

An Op-Amp can not only amplify currents and voltages, it can also act itself as current source. Here is an scematic of an typical current source build by an Op-Amp:

Fig. 1: Non-inverting Op-Amp: current source

$U_{DD} \approx 10\text{V}$, $U_{SS} \approx -10\text{V}$, $R_1 = 220\text{k}\Omega$, $R_2 = 10\text{k}\Omega$
