### Op-Amp zero adjustment without feedback

Build the following circuit in [figure 1](#) with the power supply and a multimeter.

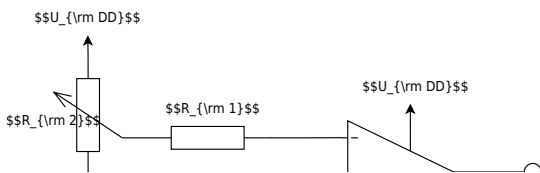

Fig. 1: Zero adjustment

$U_{DD} = 10V, U_{SS} = -10V, R_1 = 100k\Omega, R_2 = 10k\Omega$

Adjust the output of the Op-Amp to zero and describe your results.

How can the circuit be improved?  
Draw an improved version and explain it.
